JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 331 Nos. 1 and 2 31 JULY 1992

CONTENTS

A simple percolating fluid model for the morphology of the passive layer formed on a lithium anode
D. Armand, C. François-Rigo and J.P. Badiali (Paris, France) 707

Experimental evidence demonstrating the occurrence of reduction processes of ClO_4^- ions in an acid medium at platinized platinum electrodes
G. Horányi and I. Bakos (Budapest, Hungary) 727

Explicit finite-difference digital simulation of the effects of rate-controlled product adsorption or deposition in double-potential-step chronocoulometry
E.E. Engelman and D.H. Evans (Newark, DE, USA) 739

The hydrogen evolution reaction on amorphous Pd–Si alloys
G. Tremiliosi-Filho, E.R. Gonzalez (São Carlos, Brazil), S. Srinivasan and A.J. Appleby (College Station, TX, USA) 751

Effect of temperature on the ion transfer across an interface between two immiscible electrolyte solutions: Ion transfer dynamics
T. Wandlowski, V. Mareček, Z. Samec (Prague, Czechoslovakia) and R. Fuoco (Pisa, Italy) 765

On the significance of the simultaneity of electron transfer and cooperation in electrochemistry
H. Tributsch (Berlin, Germany) 783

Theory of electron transfer processes via chemisorbed intermediates. Part II. Current–potential characteristics
A.K. Mishra (Madras, India), B. Bhattacharjee (Bangalore, India) and S.K. Rangarajan (Karaikudi, India) 801

Kinetic parameters for heterogeneous electron transfer to tris(acetylacetonato)manganese(III) and tris(acetylacetonato)iron(III) in aproptic solvents
W.R. Fawcett and M. Opallo (Davis, CA, USA) 815

Electrochemical oxidation of *cis*-[$Mo(CO)_4$(2,2′-bipyridine)] coupled with ligand substitution reactions in non-aqueous solvents
J. Hanzlík, L. Pospíšil, A.A. Vlček and M. Krejčík (Prague, Czech and Slovak Federal Republic) .. 831

Influence of reactant size on electrochemical kinetics of europium(III)/europium(II) complexes with selected chelating ligands in the presence of adsorbed aliphatic alcohols
T.X. Hai, K. Maksymiuk and Z. Galus (Warsaw, Poland) 845

The evaluation of rate constants for rapid electrode reactions using microelectrode voltammetry: virtues of measurements at lower temperatures
L.K. Safford and M.J. Weaver (West Lafayette, IN, USA) 857

Microelectrode studies without supporting electrolyte: model and experimental comparison for singly and multiply charged ions
J.B. Cooper, A.M. Bond (Bundoora, Vic., Australia) and K.B. Oldham (Peterborough, Ont., Canada) 877

Electroreduction of nitrate and nitrite anions on platinum metals: a model process for elucidating the nature of the passivation by hydrogen adsorption
O.A. Petrii and T.Y. Safonova (Moscow, Russia) 897

Application of rapid scan cyclic voltammetry to a study of the oxidation and dimerization of *N*,*N*-dimethylaniline in acetonitrile
H. Yang, D.O. Wipf and A.J. Bard (Austin, TX, USA) 913

Electroreflectance study of redox reaction of heptylviologen at a silver electrode
H.X. Wang, T. Sagara, H. Sato and K. Niki (Yokohama, Japan) 925

Voltammetry and in-situ Fourier transform IR spectroscopy of two anthraquinone disulfonates adsorbed on graphite electrodes
J. Zhang and F.C. Anson (Pasadena, CA, USA) 945

Electrochemistry of synthetic analogues of NAD dimers
A. Anne, P. Hapiot, J. Moiroux and J.-M. Savéant (Paris, France) 959

Self-exchange electron transfer rate constants and reorganization energies for some aromatic compounds in *N,N*-dimethylformamide determined by electron spin resonance
H. Larsen, S.U. Pedersen, J.A. Pedersen and H. Lund (Århus, Denmark) 971

Effect of solvent on the kinetic and thermodynamic redox properties of Ni(III)/Ni(II) in tetraazamacrocyclic complexes with pendant amino group and cyclam studied on a glassy carbon electrode
J. Taraszewska and G. Rosłonek (Warsaw, Poland) 985

Simulated concentration profiles of redox centers in thin polymer films: oxidation-state dependence of diffusion and partitioning between film and solution
I. Fritsch-Faules and L.R. Faulkner (Urbana, IL, USA) 997

The non-metallic character of solvated conducting polymers
K. Doblhofer (Berlin, Germany) 1015

Sensitive amperometric detection of glucose by reversed phase liquid chromatography at a Prussian Blue chemically modified electrode of novel construction
J. Zhou and E. Wang (Jilin, China) 1029
